## How to Win?

Understand you never win a Regular or a Big Bonus out of blue -- you must go through a winning process. That is, you play "Normal Games" first, get a "Winning Sign," and move on to "Stand-by Games" that offer you chances to win a Regular or a Big Bonus. For details, see "[How to Win?](#)" in the section "Pachislo World." Also see "[Winning Signs and Small Prizes](#)" to win small prizes.

## Winning Signs

To win prizes, you need to know a variety of machine actions that show winning signs for oncoming prizes. For example, you see many signs on the LED display.

The Bonus Indicator also tells you an oncoming big prize!

### Bonus Indicator

When the bonus indicator illuminates, it is a sign for an oncoming bonus round!! The LED also shows a big <7>!

For advanced players, here is very interesting information.

#### Four Game Modes and a Bonus Round

You are always in the one of four game modes -- each mode has different winning rates. You can know when you shift the mode by seeing the arch lights illuminating. If you observe the patterns of illumination carefully, you can also know which mode you have entered.

##### Normal Mode

The machine decides if you shift the game mode at the rate of 1/32 games. (Note: this does not mean you can shift the game mode at the 1/32 games)

##### Express Mode

The machine decides if you win a bonus round at the rate of 1/32 games.

##### Fire Mode

The machine decides if you win a bonus round at the rate of 1/16 games.

##### Chance Mode

You have much better chance to shift to either Express or Fire Mode than you are in the Normal Mode.

To enjoy Fire Express to the fullest, you might want to try the eye shooting. For details, see "[Eye Shooting](#)" in the section "Pachislo World."
